

# POLYTOX - S<sup>®</sup>

## Ultimate Toxin Prevention Programme

**Polytox - S** is a highly effective new generation toxin binder with antimicrobial properties with ultimate combination of Alumino & other Silicates, combination of highly potent three acids namely Acetic acid, Benzoic acid & Propionic acid, Activated Charcoal, Herbal ingredients, Yeast cell wall components, Beta-glucans and Mannan-Oligosaccharides(MOS). **Polytox - S** is a free flowing powder to be mixed in Poultry feed

### Benefits

- ✓ Reduces obnoxious gases Ammonia
- ✓ Helps in maintaining better immunity
- ✓ Prevents pathogenic bacteria
- ✓ Binds effectively toxins like Aflatoxins, Ochratoxins, Zearalenone, T-2 Toxin, Fuminsine

### Administration:

Mix sufficient **Polytox - S** feed premix to supply desired levels per tonne of feed with 2 to 5 kgs feed ingredients to make a preblend. Add the remainder of the ingredients and mix thoroughly.

### Indications:

**Broilers:** Maintains weight gain and feed efficiency in the presence of Aflatoxins, Ochratoxin, T-2 Toxin, Fumonisin B1 and Zearalenone in Broilers.

**Layers:** Maintains egg production and feed efficiency in the presence of Aflatoxins, Ochratoxin, T-2 Toxin, Fumonisin B1 and Zearalenone in laying hens.

### Inclusion Rate:

500 grams per tonne of feed up to 14% moisture or 1 kg per tonne of feed above 14% moisture in feed ingredients.

### Features:

- ✓ High moisture binding
- ✓ Lessens caking of feed
- ✓ Effective Mycotoxin binder
- ✓ Improves flowability of feed
- ✓ Safe, economical and user friendly

### Presentation: 25 Kg
